Program: Management and Organizations Ph.D. Program
Rating: High Quality

As with most Tippie College of Business doctoral programs the M&O program is small (student/faculty ratio of ~1.0), highly selective, but not very diverse. Time to degree (5.3 yrs) and percent doctoral degree completion (73%) are good. The program has undertaken a revision of the curriculum to provide students greater access to faculty in the classroom and through mentored research. As a result they saw an increased number of applications for fall 2009. M&O commits to fully fund students for 5 years by using some external funding, institutional awards, and teaching assistantships. Placement of graduates is strong with the majority placed in research 1 peer schools.
