Task Force on Graduate Education: Selective Excellence

Program Ratings and Rationale

Program: Stomatology M.S. Program
Rating: Additional Evaluation Required

The Stomatology MS is offered by the Department of Oral Pathology, Radiology and Medicine. This dental program is small with 6 students having completed the degree from 2002-2009. Of these students, 4 have academic appointments, 1 has a postdoctoral appointment, and 1 international student is completing additional DDS training in the US. Viability of the program is questioned and it is unclear what this program offers that is not available through the Oral Science MS. Therefore, the Task Force suggests the merger of Stomatology into the Oral Science MS program. The program response indicates that this merger is currently being considered.
